

RESTful API — Assignment 3

Min Wu <mwu63@ucsc.edu>

Please implement the JWT-based authentication so that

1. Each kanban card has an owner
2. Only the Kanban card owner can see and manage his/her own cards and the related tasks

You have to manually create user through Python shell.

Here is the documentation for `django-rest-framework-jwt`

<http://jpadilla.github.io/django-rest-framework-jwt/>

Please zip the top-level project folder and submit the zip file.
